Project 1: User Account Management and Email Alias Configuration

Platform: ServiceDesk Simulator

Category: Identity and Access Management (IAM), User Administration

Scenario

A user requested an account update following a legal name change after marriage. The account information needed to be updated while ensuring continued email delivery to the old address.

Tasks performed

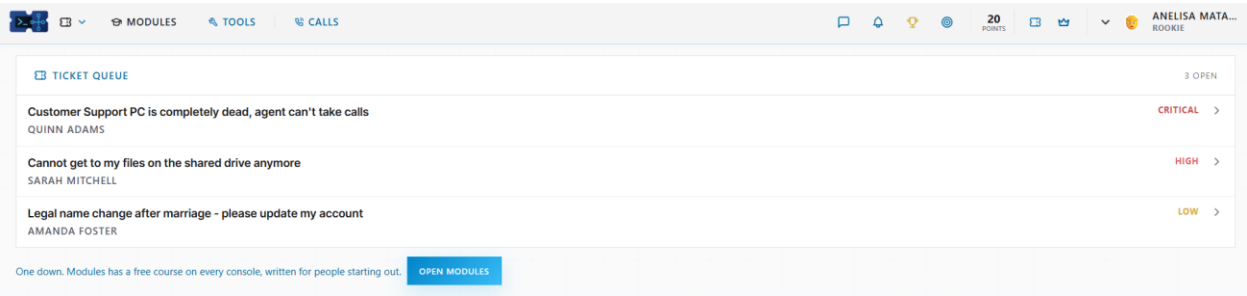

- Located the user's account in the directory.
- Updated the display name from Amanda Foster to Amanda Reyes.
- Changed the primary email address to areyes@servicedesk-simulator.com
- Retained the previous email address as an alias.
- Verified account information and email alias configuration.

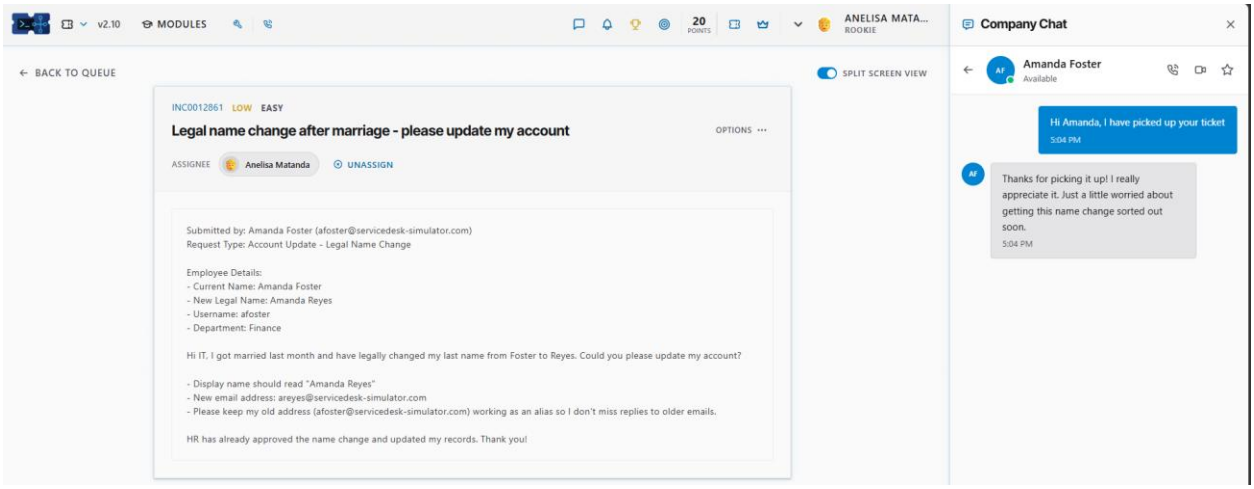

Skills demonstrated

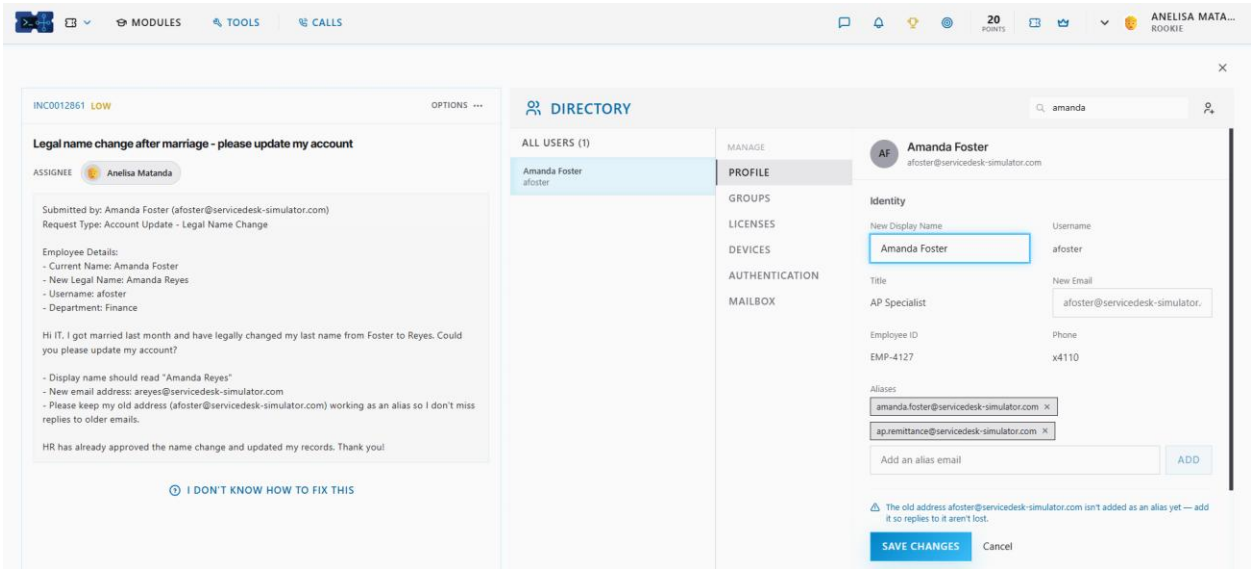

- Identity and Access Management (IAM)
- Active Directory/ Microsoft 365 style user administration
- Email alias management
- User account maintenance
- Documentation and ticket resolution

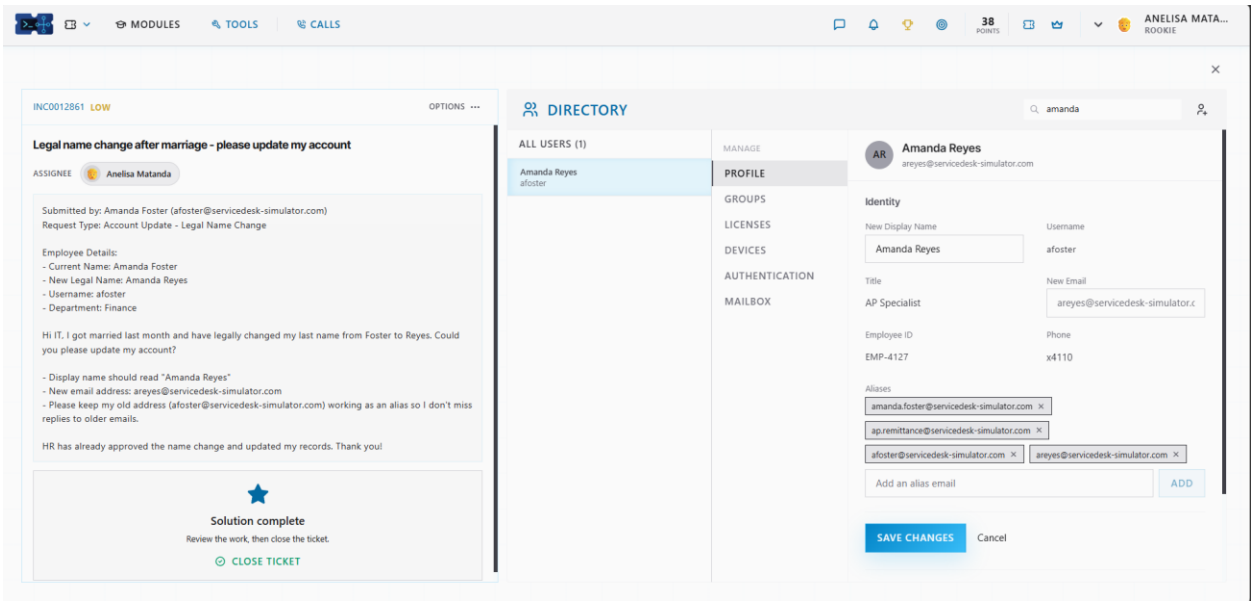

Outcome

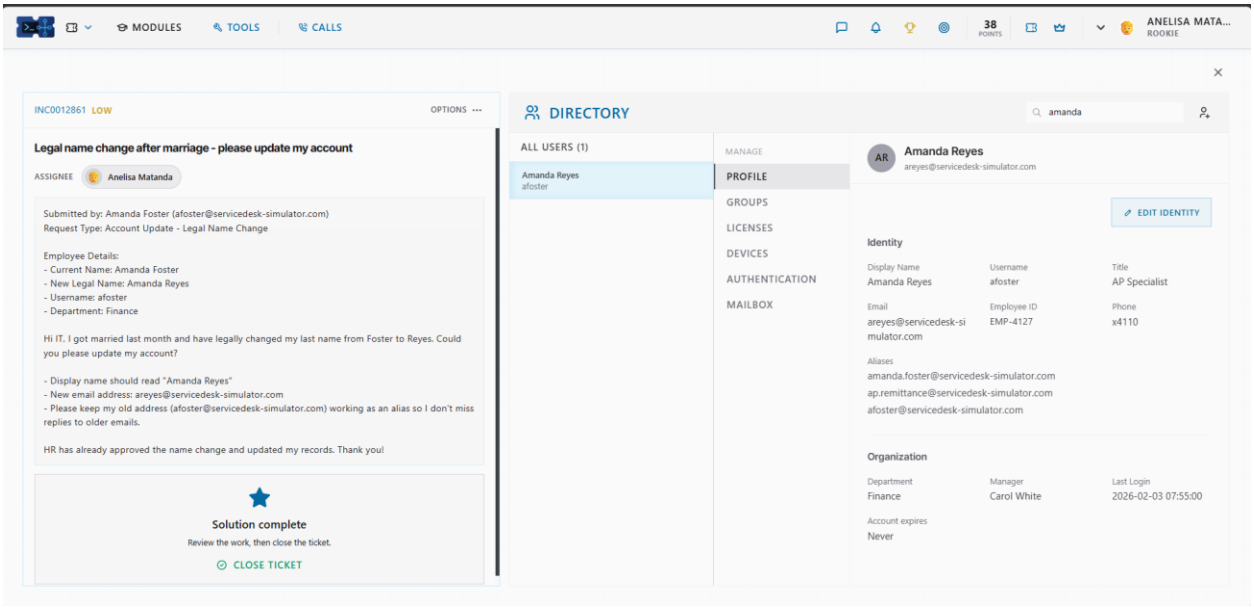

Successfully updated user identity information while maintaining uninterrupted email communication through alias configuration.

Request Type: Account Update - Legal Name Change
Employee Details:
- Current Name: Amanda Foster
- New Legal Name: Amanda Reyes
- Username: afoster
- Department: Finance
Hi IT, I got married last month and have legally changed my last name from Foster to Reyes. Could you please update my account?
- Display name should read "Amanda Reyes"
- New email address: areyes@servicedesk-simulator.com
- Please keep my old address (afoster@servicedesk-simulator.com) working as an alias so I don't miss replies to older emails.
HR has already approved the name change and updated my records. Thank you!

Project 2: Hardware Failure Investigation and Desktop Deployment

Platform: ServiceDesk Simulator

Category: Incident Management, Endpoint Deployment

Scenario

A Customer Support employee reported that their workstation would not power on and was unable to perform daily responsibilities. Initial troubleshooting indicated complete power failure.

Task performed

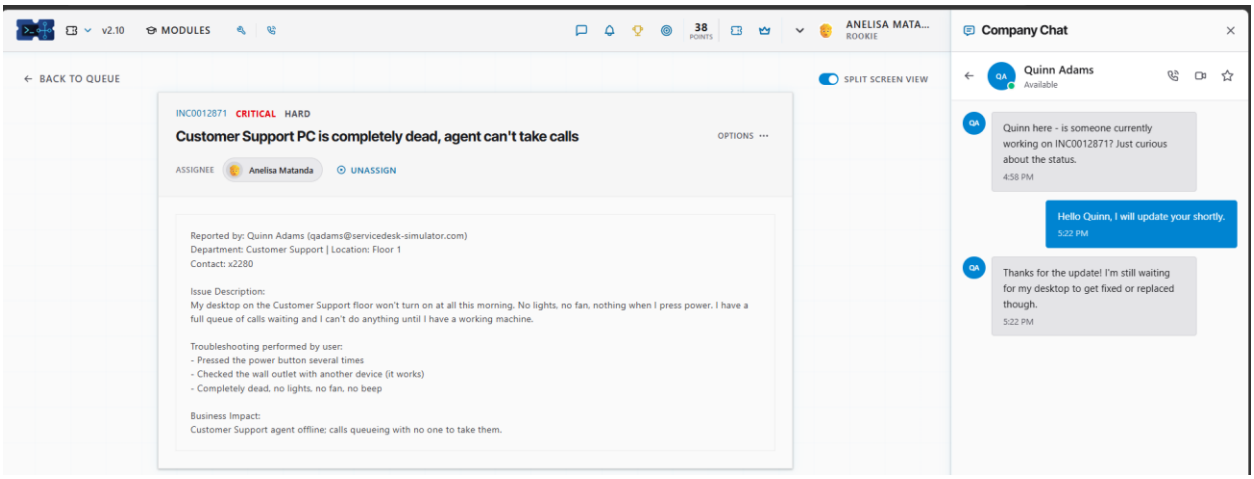

- Analyzed incident details and user reported symptoms.
- Attempted remote device access.
- Determined the workstation could not be repaired remotely.
- Identified the issue as a hardware failure.
- Provisioned a replacement desktop workstation.
- Configured the operating system deployment.
- Joined the device to the domain.
- Assigned the device to the end user.
- Managed asset registration and deployment.
- Coordinated device delivery and restoration of service.

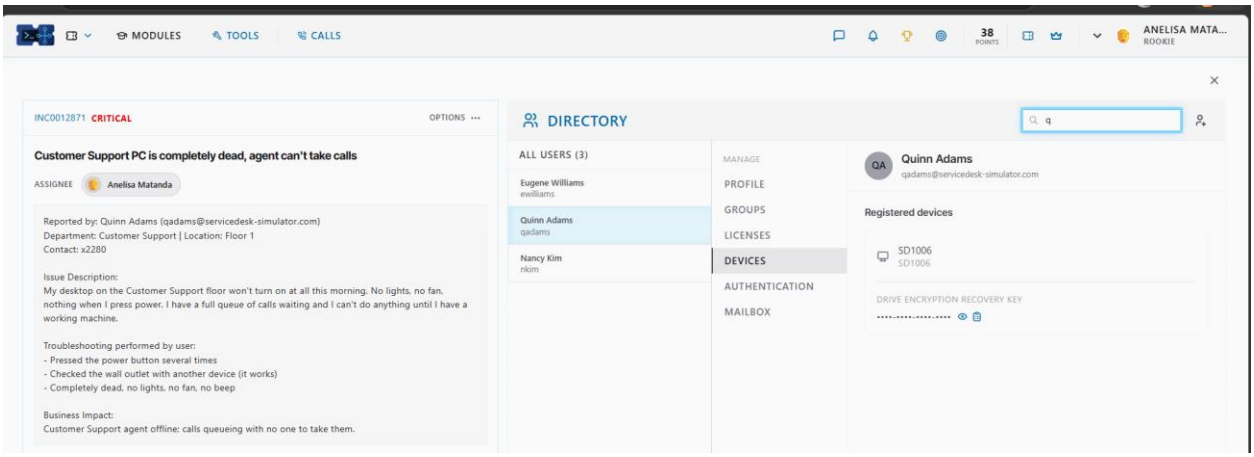

Skills demonstrated

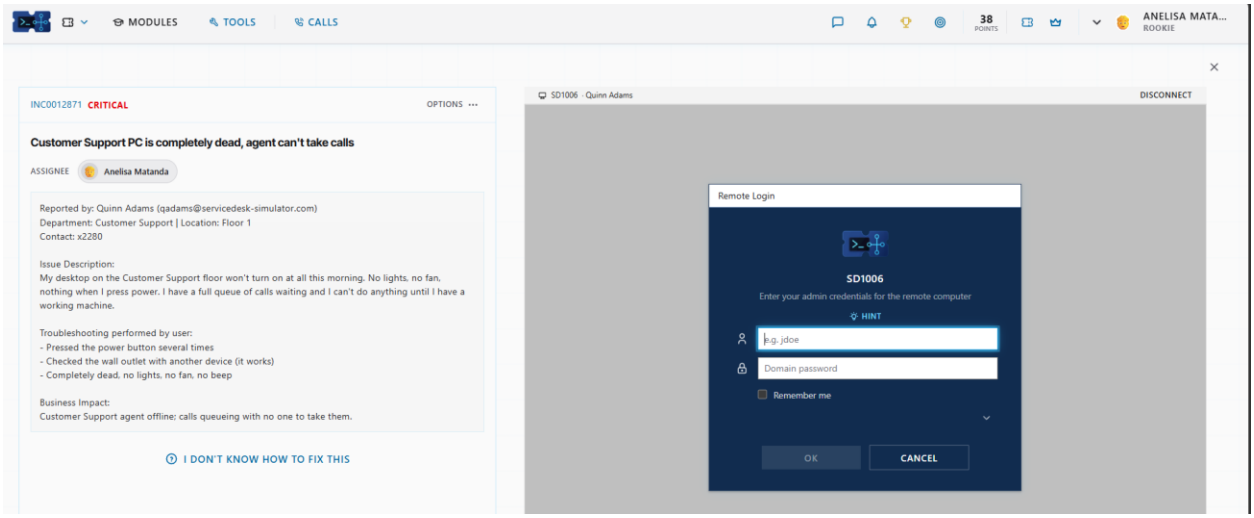

- Incident Management
- Hardware Troubleshooting
- Remote Support
- Asset Management
- Desktop Deployment
- Domain Enrollment
- Device Provisioning
- End User Support

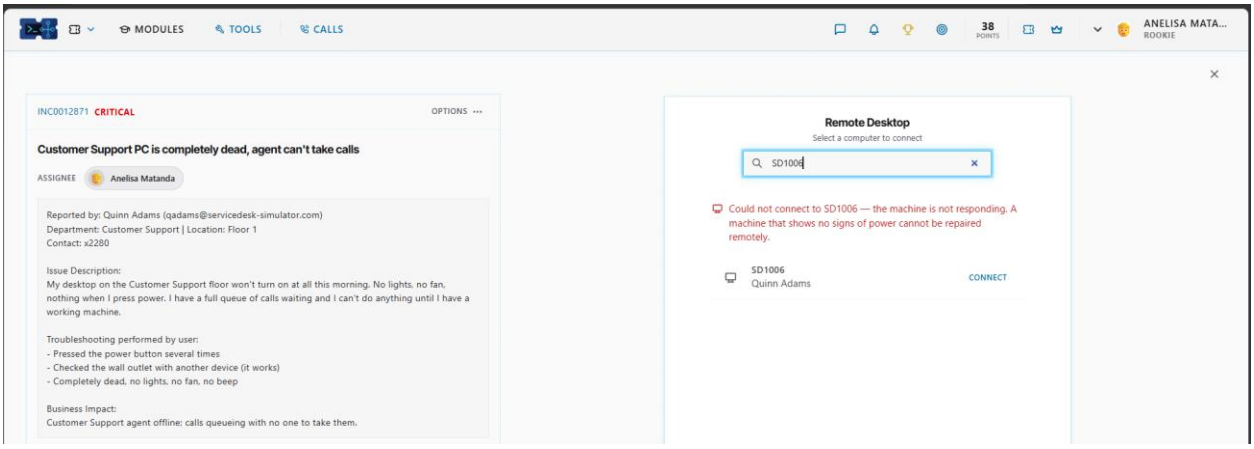

Outcome

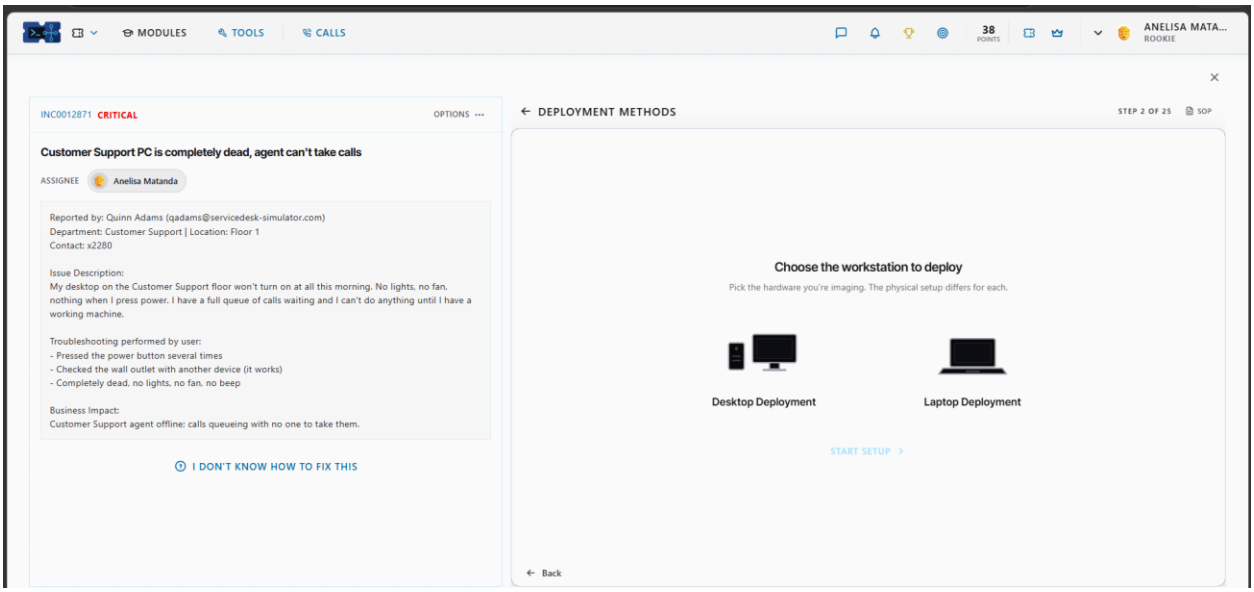

Successfully restored service by replacing the failed workstation and deploying a fully configured replacement device to the user. User confirmed the new workstation was operating correctly.

Reported by: Quinn Adams (qadams@servicedesk-simulator.com)
Department: Customer Support | Location: Floor 1
Contact: x2280
Issue Description:
My desktop on the Customer Support floor won't turn on at all this morning. No lights, no fan, nothing when I press power. I have a full queue of calls waiting and I can't do anything until I have a working machine.
Troubleshooting performed by user:
- Pressed the power button several times
- Checked the wall outlet with another device (it works)
- Completely dead, no lights, no fan, no beep
Business Impact:
Customer Support agent offline; calls queueing with no one to take them.

Issue Description:
My desktop on the Customer Support floor won't turn on at all this morning. No lights, no fan, nothing when I press power. I have a full queue of calls waiting and I can't do anything until I have a working machine.
Troubleshooting performed by user:
- Pressed the power button several times
- Checked the wall outlet with another device (it works)
- Completely dead, no lights, no fan, no beep
Business Impact:
Customer Support agent offline; calls queueing with no one to take them.
I DON'T KNOW HOW TO FIX THIS

Issue Description:
My desktop on the Customer Support floor won't turn on at all this morning. No lights, no fan, nothing when I press power. I have a full queue of calls waiting and I can't do anything until I have a working machine.
Troubleshooting performed by user:
- Pressed the power button several times
- Checked the wall outlet with another device (it works)
- Completely dead, no lights, no fan, no beep
Business Impact:
Customer Support agent offline; calls queueing with no one to take them.
